

Asymmetric Solutions Presents

Navigating **High-Risk** Human Encounters

Proactive Detection of Threats and Opportunities

All people, events, and vehicles give off certain 'signals' when they are measured against context, relevance, and societal or environmental baselines. Once learned, the operator can read these 'signals' as anomalies or as benign behaviors. Learning how to quickly establish a baseline, and then detecting and acting on anomalies, is the essence of Human Behavior Pattern Recognition & Analysis (HBPR&A).

HBPR&A is the only vetted, tested, and validated method currently available that is proven to increase your situational awareness all while promoting Advanced Critical Thinking. This skillset will give you the ability to "read" human behavior based on the universal, hard-wired, psychological, sociological, and physiological cues that all humans demonstrate.

Join the experts at Arcadia Cognerati for this intensive, **3-day** in-person training event and learn to gain the "Cognitive Edge!"

Details:

Date: Feb 6-8, 2023

Location: Farmington, MO

Price: \$675 per student * Lodging available on site for additional \$25 per day

THE TRAINING

At Arcadia Cognerati, we “train the brain” to read a baseline and proactively hunt for anomalies in your environment. Our scientifically validated programs have been proven to give you the cognitive tools necessary to **read** and **predict** human behavior.

Our Training is unique in that it provides a systematic approach to understanding key factors of the physical and human terrain and it is the only vetted, tested, and scientifically validated method that is proven to increase your critical thinking skills.

THE OUTCOMES

Our scientifically validated training methodology, coupled with our dynamic pedagogy, will develop proficiency in the following key areas:

1.) OBSERVATION

Learn HOW to spot anomalies in your environment.

2.) COMMUNICATION

Use a scientific lexicon that is legal, moral, and ethical.

3) DE-ESCALATION

From a Tactical, Operational, and Strategic perspective.

THE REVIEWS

"One of the best and most useful training courses I have ever been to. I would recommend this course to all LE."

"Essential training to all LE. Excellent teaching methodology. Very engaging. Kept me hooked the entire time."

"This course taught me invaluable lesson in understanding human behavior and reading the signs leading up to a dangerous event. Not once during this training course did I tune out or lose interest."

"Outstanding. 100% relevant training for any of us who interact with humans. Highly important for reading the environment, reading people and situations we deal with. It provides articulable science behind why we know what we know and feel during interactions."
